

**IN THE SPECIFICATION:**

**Please rewrite** the title of the invention, at the top of page 1, so that it reads as follows:

A Resin Pulley Formed of a Resin Composition Having a Phenol Resin, an Inorganic Powder, a Reinforcing Fiber, and a Lubricant

**Please rewrite** the paragraph bridging pages 8 and 9 so that it reads as follows:

As the hub, an outer ring 21 of a rolling bearing 2 shown in Fig. 1 can be used to integrate with a pulley main body 11 by insert molding, instead of the hub having a single member directly connected to the shaft. The pulley main body 11 has a peripheral recess 11a. A rolling element 22, an inner ring 23, a cage 24, and covers 25 and 26 are combined with the outer ring 21 integrated with the pulley main body 11 to assemble the rolling bearing 2, and the assembled rolling bearing 2 is filled with grease, thereby making it possible to construct the resin pulley 1.

**Please rewrite** the paragraph at page 29, line 1, so that it reads as follows:

~~CLAIMS~~ WHAT IS CLAIMED IS:

**Please rewrite** the abstract, on page 31, as shown on a separate page that is attached to this Amendment.
